Buechel Stone is committed to outstanding masonry from start to finish, and realize that proper cleaning and sealing can be even more important than the product quality itself. It is vital to the final appearance of your project that you take every precaution to use the highest quality cleaners and sealers and correctly apply them. For more information on proper application and cleaning, download the full reports.

**CAUTIONS TO BE AWARE OF:**

NEVER USE MURATIC ACID ON MASONRY PRODUCTS!  
 NEVER USE CLEANERS AND SEALERS THAT ARE NOT RECOMMENDED FOR NATURAL STONE!  
 NEVER USE A HIGH PRESSURE POWER WASHER TO CLEAN NATURAL STONE!  
 TAKE CAUTION WHEN USING A WIRE BRUSH – NYLON BRUSHES ARE LESS LIKELY TO AFFECT NATURAL PRODUCT COLORING!

Listed are the Buechel Stone Products and the proper new construction cleaners and dilution ratios. Always start with the weakest product in the weakest dilution ratios and test the cleaning process on either loose sample pieces or in an inconspicuous area.

The products listed are manufactured by PrSoCo. Visit their website for a listing of dealers that carry their products.

| <b>Product</b>               | <b>Cleaning agent</b>            | <b>Dilution Ratio</b> |
