

# LR-3639

## Weep System Technology

### What LR-3639 does:

- It is the only metal termination on the market that is specifically designed to accommodate a rain screen drainage plane material and "weep."
- Forms the bottom edge of the scratch coat and the bottom edge of the thin-set mortar.
- Large 1" slots, placed frequently along bottom edge provide favorable egress points for moisture to exit thin veneer wall system.

### How to install LR-3639\*

- Install below foundation plate line - a minimum of four inches above the grade.
- Make sure construction paper, EMC-3639, metal lath, scratch coat and thin veneers all go inside the LR-3639.

## Ordering and Shipping Information

<b>Product Number</b>	<b>LR-3639</b>
<b>Piece Length (Feet)</b>	8
<b>Units per Tube</b>	20
<b>Linear Feet per Tube</b>	160

### L+R Weep Screed Specifications

26 gauge galvanized steel bent into 70° L shape. Vertical attachment flange - 3.5" (89 mm), ground - 0.5" (13 mm), bonding slots 1" (51mm) punched 1.75" (44.45 mm) apart, 8 ft long.
